Disclosure Policies & Accreditation

As a program jointly provided by The Aesthetic Society and FSPS, we must ensure balance, independence, objectivity and scientific rigor in our educational activities. All planners, presenters and faculty members are required to disclose all relevant financial relationships with commercial interests in advance of the activity. Anyone who refuses to disclose will be removed. All disclosures are reviewed by The Aesthetic Society & FSPS. Conflicts of interest are identified and mitigated in advance of the activity.

All planners, presenters and faculty members' disclosures will be provided to the audience in advance of the activity and via slides. Additionally, all presenter disclosures will be announced verbally.

Additionally, if any unapproved or off label use of a product is to be referenced in a CME program presentation, the presenter is required to disclose that the product is either investigational or it is not labeled for the usage being discussed. The Aesthetic Society & FSPS shall convey any information disclosed by the presenter to the CME program audience prior to the activity. FSPS does not allow commercial interests to influence the planning of our educational activities. The Aesthetic Society & FSPS adhere to the ACCME Standards for integrity and independence.

Accreditation: This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint providership of The Aesthetic Society and Florida Society of Plastic Surgeons.

The Aesthetic Society designates this live activity for a maximum of *16.5 AMA PRA Category 1 Credits™*. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Of the *16.5 AMA PRA Category 1 Credits*, 4.50 have been identified as applicable to patient safety. ▲

This activity will address the following ACGME/ABMS competencies:

- Patient Care
- Procedural Skills
- Medical Knowledge
- Systems-Based Practice

Jointly provided by
The American Society for
Aesthetic Plastic Surgery, Inc.

Educational grant provided by Mentor Worldwide LLC

2022 Program Objectives

At the completion of this CME activity, registrants will be able to:

- Comply with and take advantage of the new Florida laws affecting plastic surgeons that have been enacted over the course of 2022,
- Review current techniques in rhinoplasty and periorbital surgery,
- Discuss the and safe techniques in facial rejuvenation procedures,
- Discuss presenter's research projects, the results, and the potential application to plastic surgeons' practices,
- Analyze body contouring procedures to increase safe patient outcomes,
- Identify and evaluate the latest ultrasound technology,
- Review the safety and efficacy of BBL surgery to improve patient outcomes.

Natrelle[®] Breast Implants IMPORTANT SAFETY INFORMATION

WARNINGS

Breast implants are not lifetime devices. The longer patients have them, the greater the chance they will develop complications, which may require more surgery. Breast implants have been associated with a cancer of the immune system called breast implant-associated anaplastic large cell lymphoma (BIA-ALCL). Some patients have died from BIA-ALCL. Patients have also reported a variety of systemic symptoms, such as joint pain, muscle aches, confusion, chronic fatigue, autoimmune diseases, and others. Some patients report complete resolution of symptoms when the implants are removed without replacement.

INDICATIONS

Natrelle[®] Breast Implants are indicated for breast augmentation in women at least 22 years old for silicone-filled implants, women at least 18 years old for saline-filled implants, and for breast reconstruction to replace breast tissue that has been removed due to cancer or trauma or that has failed to develop properly due to a severe breast abnormality. This indication also includes revision surgery for primary breast augmentation and breast reconstruction.

IMPORTANT SAFETY INFORMATION

Breast implant surgery should NOT be performed in women with an active infection, untreated breast cancer or precancer, or who are pregnant or nursing. Tell your doctor about any conditions you have, any medications you are taking, and any planned cancer treatments.

Avoid damage during surgery: Care should be taken to avoid the use of excessive force and to minimize handling of the implant. Follow recommended fill volumes for saline implants to decrease possibility of shell wrinkling and crease-fold failure.

Safety and effectiveness have not been established in patients with autoimmune diseases, a compromised immune system, planned chemotherapy or radiation following breast implant placement, conditions or medications that interfere with wound healing and blood clotting, reduced blood supply to breast tissue, or clinical diagnosis of depression or other mental health disorders.

Possible adverse events include implant rupture with silicone-filled implants, implant deflation with saline-filled implants, capsular contracture, reoperation, implant removal, pain, changes in nipple and breast sensation, infection, scarring, asymmetry, wrinkling, implant displacement/migration, implant palpability/visibility, breastfeeding complications, hematoma/seroma, implant extrusion, necrosis, delayed wound healing, infection, breast tissue atrophy/chest wall deformity, calcium deposits, and lymphadenopathy.

For more information, please see the full Directions for Use at www.allergan.com/products. To report a problem with *Natrelle[®] Breast Implants*, please call Allergan[®] at 1-800-624-4261.

The sale and distribution of this device is restricted to users and/or user facilities that provide information to patients about the risks and benefits of this device in the form and manner specified in the approved labeling provided by Allergan[®].
