Natrelle® Breast Implants IMPORTANT SAFETY INFORMATION

WARNINGS

- Breast implants are not considered lifetime devices. The longer patients have them, the greater the chance they will develop complications, some of which will require more surgery
- Breast implants have been associated with the development of a cancer of the immune system called breast implant-associated anaplastic large cell lymphoma (BIA-ALCL). This cancer occurs more commonly in patients with textured breast implants than smooth implants, although rates are not well defined. Some patients have died from BIA-ALCL
- Patients receiving breast implants have reported a variety of systemic symptoms, such as joint pain, muscle aches, confusion, chronic fatigue, autoimmune diseases, and others. Individual patient risk for developing these symptoms has not been well established. Some patients report complete resolution of symptoms when the implants are removed without replacement

INDICATIONS

Natrelle® Breast Implants are indicated for women for the following:

- **Breast augmentation for women at least 22 years old for silicone-filled implants and breast augmentation for women at least 18 years old for saline-filled implants.** This includes primary breast augmentation to increase the breast size, as well as revision surgery to correct or improve the result of a primary breast augmentation surgery
- **Breast reconstruction.** This includes primary reconstruction to replace breast tissue that has been removed due to cancer or trauma or that has failed to develop properly due to a severe breast abnormality. Breast reconstruction also includes revision surgery to correct or improve the result of a primary breast reconstruction surgery

CONTRAINDICATIONS

Breast implant surgery should not be performed in:

- Women with active infection anywhere in their body
- Women with existing cancer or precancer of their breast who have not received adequate treatment for those conditions
- Women who are currently pregnant or nursing

ADDITIONAL WARNINGS

- See Boxed Warning
- Avoid damage during surgery: Care should be taken to avoid the use of excessive force and to minimize handling of the implant. Forcing of implants through too small an opening or applying concentrated localized pressure on the implants may result in localized weakening of the breast implant shell, potentially leading to shell damage and possible implant rupture.

An incision should be of appropriate length to accommodate the style, size, and profile of the implants. Use care when using surgical instruments in proximity with the breast implant

- Follow recommended fill volumes for saline implants to decrease possibility of shell wrinkling and crease-fold failure

PRECAUTIONS

Safety and effectiveness have not been established in patients with the following:

- Autoimmune diseases (eg, lupus and scleroderma)
- A compromised immune system (eg, currently receiving immunosuppressive therapy)
- Planned chemotherapy or radiation following breast implant placement
- Conditions or medications that interfere with wound healing and blood clotting
- Reduced blood supply to breast tissue
- Clinical diagnosis of depression or other mental health disorders, including body dysmorphic disorder and eating disorders. Please discuss any history of mental health disorders prior to surgery. Patients with a diagnosis of depression, or other mental health disorders, should wait until resolution or stabilization of these conditions prior to undergoing breast implantation surgery

ADVERSE EVENTS

Possible adverse events with breast implant surgery include implant rupture with silicone implants, implant deflation with saline-filled implants, capsular contracture, reoperation, implant removal, pain, changes in nipple and breast sensation, infection, scarring, asymmetry, wrinkling, implant displacement/migration, implant palpability/visibility, breastfeeding complications, hematoma/seroma, implant extrusion, necrosis, delayed wound healing, infection, breast tissue atrophy/chest wall deformity, calcium deposits, and lymphadenopathy. Other systemic conditions have been reported with breast implants.

For more information, please see the full Directions for Use at www.allergan.com/products.

To report a problem with *Natrelle®* Breast Implants, please call Allergan® at 1-800-624-4261.

The sale and distribution of this device is restricted to users and/or user facilities that provide information to patients about the risks and benefits of this device in the form and manner specified in the approved labeling provided by Allergan®

DISCLOSURE POLICIES & ACCREDITATION

As a program jointly provided by The Aesthetic Society and FSPS, we must ensure balance, independence, objectivity and scientific rigor in our educational activities. All planners, presenters and faculty members are required to disclose all relevant financial relationships with commercial interests in advance of the activity. Anyone who refuses to disclose will be removed. All disclosures are reviewed by The Aesthetic Society & FSPS. Conflicts of interest are identified and mitigated in advance of the activity.

All planners, presenters and faculty members' disclosures will be provided to the audience in advance of the activity and via slides. Additionally, all presenter disclosures will be announced verbally.

Additionally, if any unapproved or off label use of a product is to be referenced in a CME program presentation, the presenter is required to disclose that the product is either investigational or it is not labeled for the usage being discussed. The Aesthetic Society & FSPS shall convey any information disclosed by the presenter to the CME program audience prior to the activity. FSPS does not allow commercial interests to influence the planning of our educational activities. The Aesthetic Society & FSPS adhere to the ACCME Standards for integrity and independence.

Accreditation: This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint providership of The Aesthetic Society and Florida Society of Plastic Surgeons.

The Aesthetic Society designates this live activity for a maximum of *15.0 AMA PRA Category 1 Credits™*. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Of the *15.0 AMA PRA Category 1 Credits*, 4.75 have been identified as applicable to patient safety.▲

This activity will address the following ACGME/ABMS competencies:

- Patient Care
- Procedural Skills
- Medical Knowledge
- Systems-Based Practice

Jointly provided by
The American Society for
Aesthetic Plastic Surgery, Inc.

2023 PROGRAM OBJECTIVES

At the completion of this CME activity, registrants will be able to:

- Comply with and take advantage of the new Florida laws affecting plastic surgeons that have been enacted over the course of 2023,
- Review the safety and efficacy of BBL surgery to improve patient outcomes,
- Discuss and evaluate up-to-date data on breast implant illness,
- Discuss presenter's research projects, the results, and the potential application to plastic surgeons' practices,
- Analyze evidence to maximize safety to improve patient outcomes,
- Identify and evaluate the latest techniques and technology for face and neck lifts,
- Discuss and evaluate updates related to regenerative medicine.
